Summary (Fresher)

Motivated **Computer Science student** with strong **problem-solving, leadership, and teamwork skills**. Hands-on experience in **web development, backend systems, and database management** through various projects and hackathons. Passionate about learning new technologies and applying innovative solutions. Eager to contribute **technical expertise, adaptability, and enthusiasm** to a dynamic team.

Education

Chitkara University
Bachelor of Engineering in Computer Science (Expected Graduation: August 2027)

Technical Skills

- **Programming Languages:** JavaScript, Python, C++, Java
- **Web Development:** Next.js, Express.js, HTML, CSS
- **Backend Development:** REST APIs, authentication, data management
- **Databases:** MongoDB, MySQL, Firebase
- **Version Control:** Git, GitHub (strong hands-on experience)
- **Development Tools & Platforms:** VS Code, Postman, Docker (basic knowledge)
- **Problem-Solving:** Data structures, algorithms, competitive programming

Projects & Experience

- **Resume Builder Website (Atingle)**
  - Developed a professional resume-building platform with an interactive user interface.
  - Designed a **responsive and user-friendly UI** to enhance accessibility and ease of use.
- **Task Management System (PLANNET)**
  - Built a task-tracking system with **real-time updates** and **automated notifications** to improve workflow efficiency.
  - Integrated a **role-based access control system** to enhance security and user management.
- **E-commerce Website using ONDC (Ongoing)**
  - Developing a **scalable seller-side platform** leveraging ONDC technology.
  - Implementing **secure product management and transaction features** for a seamless e-commerce experience.
- **Hackathons & College Projects**
  - Actively participated in multiple hackathons, collaborating in teams to develop **innovative tech solutions**.
  - Led project teams, demonstrating strong **problem-solving, leadership, and teamwork skills**.
- **Version Control & Collaboration**
  - Extensive hands-on experience managing **Git and GitHub repositories**, ensuring smooth collaboration and version control for multiple projects.
